## Coronavirus COVID-19

Antwerp, Belgium, 18 March 2020

Dear Madam, Dear Sir,

As you are well aware, the situation regarding the COVID-19 disease continues to develop and governments across Europe are increasing precautionary measures to contain the spread of the virus.

The health and safety of our employees (and contractors) is of the utmost importance to us. We have requested all our employees to work from home, if technically possible. However, for some operational roles within our organization, working from home is not a possibility. In order to safeguard the health and safety of our employees and those of third parties, we have requested our employees to consider telephone- or videoconferencing when meeting internally or externally. In case this should not be possible, we encourage everyone to maintain safe distance and to hold physical meetings in open air. We would like to ask for your support and understanding in this regard.

VGP is making its best efforts to assist its tenants including the completion of ongoing construction works for our tenants in time. To date, the outbreak of the COVID-19 disease has not yet caused major disruptions in relation to our business activities though we understand from authorities and contractors that it is likely that the outbreak and the related governmental precautionary measures across Europe may lead to such disruptions in the near future.

We would like to assure you that VGP is taking all reasonable and necessary actions to prevent or limit disruptions as much as possible given these exceptional and unforeseeable circumstance. We are closely monitoring the national and international developments together with authorities and our contractors to assess and mitigate the potential impact on our business activities. In doing so, we hope to respond effectively to this rapidly evolving situation, and we will update you on any major developments.

Finally, we are assessing internally how we can aid and assist the communities in which we are active and which we call our home. The outbreak of COVID-19 is not only testing our logistics systems but also our communities for their resilience. Please feel free to reach out if VGP may be of assistance in this regard.
